

Course Syllabus

Thesis: Sexual, Reproductive and Perinatal Health 15 Credits*, Second Cycle

Learning Outcomes

Upon completion of the course, students will independently be able to:

- conduct a scientific investigation using relevant design, methodology and analysis
- critically analyse concepts, theories and perspectives in global sexual, reproductive health and rights from a sustainability perspective
- identify a scientific problem statement and purpose based on current research knowledge in a defined area
- search, critically evaluate and synthesise scientific evidence, and integrate theories and concepts within the chosen area
- conform to research ethical principles
- argue for and critically reflect on their chosen design in relation to the scientific purpose
- analyse and evaluate their results in relation to previous research
- evaluate their own contribution to the development of knowledge and give suggestions for further research
- defend and communicate their own scientific work and critically evaluate the scientific work of others concerning the degree of scientific, systematicity, content and structure.

Course Content

In the course, students learn how to plan, conduct and compile a scientific investigation within the field of sexual, reproductive and perinatal health in compliance with the different components of the research process. The course also includes the defence of the degree thesis and the critical review of another student's degree thesis.

Assessment

Seminars and a thesis are examination

Forms of Study

Individual work, group work and in pair, lectures, supervision and compulsory seminars

Grades

The Swedish grades A–F.

Number of credits:

- Examination, opponent/respondent, 15 credits

Prerequisites

A Bachelors degree 180 credits in a social sciences/health sciences/economics main field of study and English 6

Other Information

This is a course in the Master's Programme in Global Sexual and Reproductive Health.

Subject:

Sexual, Reproductive and Perinatal Health

Group of Subjects:

Nursing Science

Disciplinary Domain:

Health Science, 75%

Medicine, 25%

This course can be included in the following main field(s) of study:

1. Sexual, Reproductive and Perinatal Health

Progression Indicator within (each) main field of study:

1. A1E

Approved:

Approved 17 June 2020

Valid from 18 January 2021

Revised:

Revised, 25 June 2020

Revision is valid from 25 June 2020
